### DETAILED ACTION

1. Miscellaneous letter containing the Applicants' Response to the Non-Compliant Amendment filed on 03/01/06 is acknowledged. In response to the Applicants' remarks the examiner would like to note that she failed to find preliminary amendment to the claims in the instant application filed in September 2003, as indicated by the Applicants. The amendment to the claims provided in the letter refers to the parent application 09/877,625 and is not automatically transferred to the child case.

The amendment is entered.

### EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald D. Hantman on 08/07/06.

The application has been amended as follows:

In claims 2 and 20 before first using of the term TAN insert "Total Acid Number".

3. **Claims 1-10 and 12-25** are allowed.

The following is an examiner's statement of reasons for allowance: the examiner agrees with the Applicants' arguments that the primary reference of Matsushita does not teach determining IR absorbance in several specific wavelengths ranges recited in claim 1. Newly found references related to using FTIR in measuring TAN in lubricants are either not the prior art for the instant application or not teaching the specific IR ranges for determining TAN in cures, feedstock or distillation fractions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
